Data are expressed as the means ± SE. Comparisons with controls were performed by Dunnett's test. Comparisons among the groups at similar time points were analyzed by Student's t-test. \*\*  $P < 0.01$  and \*  $P < 0.05$  versus controls. ††  $P < 0.01$  and †  $P < 0.05$  versus the sham operation subjects. 80% SBR, 80% small bowel resection.
