

## Content

1, Greeting. Sato E and Jia XS	- 1
2, Program of the symposium	- 2
3, International academic project analyzing pathogenic factors in Chinese gastric B-cell lymphomas. Hasui K, Jia XS, Sato E, Nakagawa M, Izumo S	- 3
4, Molecular pathological comparison of primary gastric B-cell lymphomas in China and Japan: Polymerase chain reaction (PCR) analysis of immunoglobulin heavy chain gene variable region and direct sequencing of the product. Jia XS, Hasui K, Sato E, Huang W, Li Y, Izumo S, Nakagawa M, Osame M. Revised by Hasui K and Higashi M	- 6
5, Study of Helicobacter pylori in China He HY, Jia SX, Hasui K, Song JY	- 12
6, Diagnosis and Treatment of primary malignant gastric lymphoma Xu H, Wang S	- 17
7, Radiographic and endoscopic diagnoses of gastric malignant lymphoma, especially mucosa-associated lymphoid tissue (MALT) type lymphoma Aozaki S, Otsuji M, Nishimata H, Nishimata Y, Misono T	-22
8, The treatment of primary gastric lymphoma - Role of Surgery - Hokita S, Aikou T, Ishigami S, Aridome K, Nakajo A, Tokuda K, Natsugoe S, Baba M, Takao S	-24
9, Proposed new WHO classification for lymphoid and hematopoietic neoplasms Kikuchi M	-27
10, Paraffin-immunohistochemical features of lymphocytes in mucosa-associated lymphoid tissue and the regional lymph node in stomach with Helicobacter pylori-associated peptic ulcer Hasui K, Arimura Y, Higashi M, Taki C, Sakoda A, Nomoto M, Sueyoshi K, Nakamura T, Sato E	-28
11, Constant extraction of DNA from paraffin-embedded gastric surgical and biopsy specimens for polymerase chain reaction (PCR) analysis. Hasui K, Higashi M, Lou H, Yashiki S, Nakamura T, Sueyoshi K, Tashiro Y, Shirahama H, Sato E.	- 32
12, Role of the tonsil in HTLV-I infection : A molecular Pathological analysis. Izumo S, Takenouchi N, Matsuoka E, Nagai M, Katsuta K, Ueno K, Isashiki Y, Hasui K	-38
13, Genetic analysis of gastric B-cell lymphoma: Application of cycle sequencing technique with fluorescent dyes. Taniguchi S, Nakagawa M, Hasui K, Osame M.	- 40
14, Detection of IgH variable region gene in paraffin-embedded tissues from MALT lymphomas using the polymerase chain reaction Yumoto N, Kurosu K, Furukawa M, Mikata A	-45
15, Somatic mutation of immunoglobulin heavy chain variable region genes in gastric low-grade MALT type lymphoma Hojo H, Kuze T, Nakamura N, Hashimoto Y, Abe M	-48
16, Somatic mutation in rearranged IgHV gene in various B-cell malignancies Tamaru J, Humml M, Itoyama S, Stein H	-51
