

## Program

---

1999.7.18

- pm 2:00 **Pre-symposium meeting**
- pm 7:00 **Welcome party**

1999.7.19

- am 9:30 **Opening/Greeting.**

Honorary President of the symposium: Sato E

Vice President of China Medical University: He Qin Cheng

Chinese-side President of the symposium: Jia XS

- am 9:35 International academic project analyzing pathogenic factors in Chinese gastric B-cell lymphomas.

Secretary of the symposium: Hasui K

### Part 1. Gastric malignant lymphoma in China

Chairmen: Kikuchi M, Sato E

- am 9:40 Previous study of this project: Molecular pathological comparison of primary gastric B-cell lymphomas in China and Japan: Polymerase chain reaction (PCR) analysis of immunoglobulin heavy chain gene variable region and direct sequencing of the product. Jia XS et al
- am 10:10 Study of Helicobacter pylori in China He HY et al
- am 10:20 Diagnosis and Treatment of primary malignant gastric lymphoma Xu H et al

Coffee break (am 10:40 - am 11:00)

### Part 2. Gastric malignant lymphoma in Japan (Kagoshima), Clinical aspect

Chairmen: Xu H, Kikuchi M

- am 11:00 Radiographic and endoscopic diagnosis of gastric malignant lymphoma, especially mucosa-associated lymphoid tissue (MALT) type lymphoma Aozaki S, Otsuji M et al
- am 11:20 The treatment of primary gastric lymphoma - Role of Surgery - Hokita S, Aridome K et al

Lunch time (am 11:40 - pm 1:00)

### Part 3. Classification of malignant lymphomas

Chairmen: Sato E, Jia XS

- pm 1:00 Proposed new WHO classification for lymphoid and hematopoietic neoplasms Kikuchi M

### Part 4. Technical aspects in immunohistochemistry and molecular pathology

Chairmen: Jia XS, Kikuchi M

- pm 2:00 Paraffin-immunohistochemical features of lymphocytes in mucosa-associated lymphoid tissue and the regional lymph node in stomach with Helicobacter pylori-associated peptic ulcer Nakamura T et al
- pm 2:10 Constant extraction of DNA from paraffin-embedded gastric surgical and biopsy specimens for polymerase chain reaction (PCR) analysis. Hasui K, Nakamura T, Sato E.
- pm 2:20 Role of the tonsil in HTLV-I infection: A molecular Pathological analysis. Izumo S et al
- pm 2:50 Genetic analysis of gastric B-cell lymphoma: Application of cycle sequencing technique with fluorescent dyes. Taniguchi S et al

Coffee break (pm 3:20 - pm 3:40)

### Part 5. Molecular pathology of immunoglobulin heavy chain genes

Chairmen: Abe M, Izumo S

- pm 3:40 Somatic mutation in rearranged IgHV gene in various B-cell malignancies Tamaru J et al
- pm 4:10 Detection of IgH variable region gene in paraffin-embedded tissues from MALT lymphomas using the polymerase chain reaction Yumoto N et al
- pm 4:40 Somatic mutation of immunoglobulin heavy chain variable region genes in gastric low-grade MALT type lymphoma Hojo H, Kuze T, Abe M et al

- pm 5:10 **Closing**

Japanese-side President of the symposium: Izumo S

- pm 7:00 **Dinner party**
-
